RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2000 Analytical Review DWCCA-1645-ELE

Dear Mr. Kaldunski:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. On page W-10, 7,320 kWh is reported for pumping. If we divide the \$1,543 reported in Account 620, power used for pumping expense, by the 7,320 kWh, the resulting cost is over 21 cents per kWh. The statewide average cost of a kWh is 6 cents. Please confirm your cost of 21 cents per kWh or otherwise explain why only 7,320 kWh is reported on page W-10.

2. Enclosed is our calculation of the Public Fire Protection Service Charge. It differs from the amount charged on page W-4 by \$50. Please follow our method of calculation in the future.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 266-3768. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient

for you to do so. My e-mail address is engele@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Response received per telephone 9/17/01:

1. The pumping expense in a/c 620 was not correct. Will watch next year. The kWh is correct.
 2. One hydrant is not in use. Will footnote schedule next year.
